Assessment Dashboard

Findings

Branding / Design

The site employs a number of page layouts including landing page and form submission page.

The site does not include a traditional menu, breadcrumb or search functionality.

GovCMS Considerations

The site is small, containing only 3 pages and a simple form for the submission of badge information.

Accessibility

The branding has a large number of accessibility issues (WCAG 2.0 A and AA) which affect the majority of site pages and would need to be addressed when migrating to the GovCMS platform.

Pages with WCAG 2.0 A issues are unusable for some people, pages with WCAG 2.0 AA issues make it difficult for some people to use the page.

The site does not contain any AGLS Metadata, which is mandatory for all Australian Government Agency Websites.

Responsive Design

The site specifies a viewport matching the device's size, allowing it to render appropriately across devices.

Broken Links

The site does not contain any internal or external broken links. Internal links include links to pages, images or web artefacts within the current site, whilst external links can include web pages hosted on external sites, scripts / web resources from public repositories and multimedia files hosted on external sites.

Technical Recommendation

The Great Badge Swap site has a low complexity rating, with a simple design and user submission form. As the site appears to still be in use for user submissions, a migration to GovCMS would greatly simplify the authoring process in addition to addressing the accessibility issues that exist on the current site.

	Site Complexity	Functionality	Currency	Delivery	Conclusion
Keep/Make Static	Large / Complex	Out of the Box	Not Updated	Static	Move to GovCMS
Move to GovCMS	Small / Simple	Extended	Updated Often	Dynamic
