Assessment Dashboard

Findings

Branding / Design

The site employs a unique page layout for each of its 3 pages.

The site does not include a traditional menu, breadcrumb or search functionality. In-page clusters of page links (sudo-menus) are used inconsistently across the site.

GovCMS Considerations

The site is currently served statically. Re-creating the site in GovCMS will require a not insignificant amount of effort to update the branding and address the WCAG issues that exist.

The site continues to point to the sbs.com.au hosted survey which has since been removed.

The results of the survey are currently available as part of the statically served content on the site.

Accessibility

The branding has a small number of accessibility issues (WCAG 2.0 A and AA) which affect the site pages.

Pages with WCAG 2.0 A issues are unusable for some people, pages with WCAG 2.0 AA issues make it difficult for some people to use the page.

The site does not contain any AGLS Metadata, which is mandatory for all Australian Government Agency Websites.

Responsive Design

We have not identified a favicon on the site. Favicons are a way to increase brand visibility and make your page more recognizable when browsing amongst multiple browser tabs or bookmarks.

Broken Links

The site does not contain any internal or external broken links. Internal links include links to pages, images or web artefacts within the current site, whilst external links can include web pages hosted on external sites, scripts / web resources from public repositories and multimedia files hosted on external sites.

Technical Recommendation

If this site is no longer actively maintained, it is already a static site and should continue to serve the content through the newly agreed approach to handling the museums static websites.

	Site Complexity	Functionality	Currency	Delivery	Conclusion
Keep/Make Static	Large / Complex	Out of the Box	Not Updated	Static	Keep a Static Website
Move to GovCMS	Small / Simple	Extended	Updated Often	Dynamic
