Assessment Dashboard

Findings

Branding / Design

The site employs a number of page layouts including landing page, category/roll up page and individual item pages.

The site does not include a traditional menu, breadcrumb or search functionality.

GovCMS Considerations

The site appears to be heavily database driven, and in the absence of any design documentation the analysis is limited to the content that is served publicly on the site.

Observed functionality to be replicated includes:

- Metadata driven categories allowing a single item to be navigated to through multiple pathways.

- A result of the metadata driven navigation is that each item may have a number of URL's on the website.
- Sort order and display order are not sequential and not ordered. The badges displayed on category roll up pages and in 'badge clouds' do not appear to follow any logical sorting order, although the order that is applied persists across multiple page loads and content refreshes.

Accessibility

The branding has a small number of accessibility issues (WCAG 2.0 A and AA) which affect the majority of site pages.

Pages with WCAG 2.0 A issues are unusable for some people, pages with WCAG 2.0 AA issues make it difficult for some people to use the page.

The site does not contain any AGLS Metadata, which is mandatory for all Australian Government Agency Websites.

Responsive Design

The site either does not have a meta viewport specified, or it is configured incorrectly. Viewports are important to ensure that page content resizes appropriately for different devices, in particular mobile and tablet.

There is some text on the site that is small and may not be legible enough for particular users. Some of the links or buttons on the site may be too small for a user to easily tap on a touchscreen.

Broken Links

The site does not contain any internal or external broken links. Internal links include links to pages, images or web artefacts within the current site, whilst external links can include web pages hosted on external sites, scripts / web resources from public repositories and multimedia files hosted on external sites.

Technical Recommendation

The Wear Your Colours site has a medium complexity rating, requiring considerable effort to maintain the current functionality (assessed on the end result only at this stage) on a GovCMS environment whilst maintaining the existing site structure (so as not to cause broken links as URL's change).

If this site is no longer actively maintained, it is a perfect candidate for archiving to a static site and serving the content through the newly agreed approach to handling the museums static websites. There is no anticipated loss of functionality if the site is archived and served statically in future.

	Site Complexity	Functionality	Currency	Delivery	Conclusion
Keep/Make Static	Large / Complex	Out of the Box	Not Updated	Static	Make a Static Website
Move to GovCMS	Small / Simple	Extended	Updated Often	Dynamic
